

# UFO Progress

When I left you last week I had hoped to have my Pfeffernuse blocks sewn together. Well, that didn't happen. I went to sew them together and WHAT??? The string blocks were too big. I failed to read the memo and cutting them to size. UGH.

I put them in a pile to work on during nap time one day this week. I often try to do a little project during nap time if everyone sleeps at the same time. Trimming the blocks down will likely take me a couple nap times but that's okay. It's something I can do in the kitchen that's quiet and still allows me to supervise the sleeping little ones.

Well that left me scrambling. I wanted to work on a UFO. I'm committed to these UFOs and know that once I do nothing on them for a week, I'll let them fall to the wayside and that's definitely not what I want...so what to do??

Well I have TWO finished Bonnie Hunter UFOs that are finished-just not quilted. Well that was an easy decision...load a quilt. Now, Wonky Wishes or Winston Ways? I ended up picking Winston Ways. Here's the truth why I picked that one. I already had a big piece of fabric to use for the backing set aside...I don't know I am backing Wonky Wishes with.

I measured and got a backing made. I loaded the quilt. Then it was time to pick thread...What would you have picked?

I ended up with the warm brown to the right. I use brown a lot on quilts like this. I sometimes blends better than anything else.

From there I started in. I'm on bobbin #2 and ready to roll the quilt for the first time. Wow...I love this quilt. What do you think?

I'm a 4 patch lover...what can say? Anything 4 patch makes me happy...so very happy. I think the only other thing that would be better would be all polka dot fabric and 4 patches all together!

Getting the quilt loaded is always the part I procrastinate on. Now that's it loaded, I'll easily find time to keep working on it. It's fun and so close to completion now. I can't wait to have a finish.

You can find me right back here next Wednesday. Dare I hope to have this finished??
